Surface finish:
E6/EV1, silver anodised

Pack sizes:
Prefabricated or stock lengths

Stock length:
3000 mm

Minimum order quantity:
50 per fixed length or 100 m

Thanks to the cooperation in production between Schüco Design and Blum, Baseline offers particularly economical manufacture of glazing frames with variable dimensions. The frame is designed for use with Blum hinges. Machining for hinges in the inner rebates is no longer necessary, which saves on set-up times. This makes it possible to produce even small numbers of units in different sizes. PVC-U cover caps can be cut to size easily and clipped onto the inside of the frames.

Benefits:

- Made for use with hinges made by Blum, Höchst:

Full overlay	71 T 950 A.22
Half overlay	71 T 960 A.22
Internal	71 T 970 A.22
- Machining for hinges not required
- Shorter set-up times
- Individual manufacture from bar lengths
- Easy to install
